Professional Summary

Fullstack Engineer with over 5 years of experience building scalable products, APIs, and internal tools. I bring a unique advantage to technical delivery: a deep, working understanding of the product. Having architected backend systems and managed cloud infrastructure on AWS, I can speak to network reliability, system uptime, and technical integrations not just as talking points, but as an engineer who has built and scaled these systems directly. I focus on building a simple and yet effective infra that ensures data integrity and high availability without unnecessary overhead.

Core Skills

- **Languages:** TypeScript, JavaScript, SQL
- **Frontend:** React.js, Next.js, Tailwind CSS, HTML/CSS
- **Backend:** Node.js, Express.js, NestJS, REST APIs, GraphQL
- **Cloud & DevOps:** AWS (EC2, S3, Lightsail, Fargate), Docker, CI/CD, Terraform
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Business Value:** Product Ownership, API Design, Scalability, Security, Simple & Effective Infrastructure

Professional Experience

Fullstack / Backend Lead Engineer – Blockroll

Oct 2023 – Present

- Designed and maintained scalable REST APIs powering payments, virtual cards, and financial swaps.
- Improved system performance by reducing average latency by 50% through database optimization and simplified architectural patterns.
- Managed infrastructure on AWS, ensuring high availability and reliability for core products.
- Translated complex third-party API integrations into seamless customer-facing features.
- Promoted into leadership role through consistent ownership and high-impact delivery.

Fullstack Software Engineer – Arewabooks

Jan 2022 – Oct 2023

- Built and maintained web platforms using Next.js and Node.js, supporting over 10,000 mobile downloads.
- Developed admin dashboards and internal management tools to streamline backend operations.

- Managed deployments and production environments on AWS to maintain strict service uptime.
- Collaborated with cross-functional teams to align technical delivery with growth goals.

Fullstack Engineering Intern – Digital Abundance

Sep 2021 – Dec 2021

- Developed internal tools and client-facing features in an agile engineering environment.
- Assisted in backend integrations and dashboard system maintenance using [Node.js](#).
- Deployed applications on AWS

Leadership & Projects

- **Techgix (Co-Founder & Lead Engineer)**: Architected and co-founded a developer content platform and engineering community.
- **SendMail (Open Source)**: Built a lightweight email service utilized by over 30 developers for automated form notifications.
- **Node Logger (Open Source)**: Developed a request logging and debugging tool specifically for Node.js API development.
- **Nuban Prediction (Open Source)**: Built an open source tool to predict banks using account numbers.

Education

- **BSc Software Engineering** – Miva University

Additional Value

- **Strategic Communication**: Able to explain complex technical stacks to stakeholders and clients clearly.
- **Technical Credibility**: Proven ability to own products end-to-end and troubleshoot high-level infrastructure.
- **Local Availability**: Based in Lagos, fully available for on-site collaboration and professional engagement.
